Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1 - 25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26 - 160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statisiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statisiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

Stockwell, M. M., K. D. Hyatt, and D. P. Rankin. 2001. A compendium of historic physical variable observations including air temperature, water temperature, river discharge, and dissolved oxygen conditions in selected portions of the Okanagan Basin in Canada and the United States. Can. Data. Rep. Fish. Aquat. Sci. 1078: 8 p. + CD-ROM.

This report and accompanying CD-ROM present historical climate, hydrographic and water temperature data for the Okanagan River and water temperature and dissolved oxygen data for Osoyoos Lake. Data sets were compiled as part of the physical variables component for the Okanagan Sockeye Limiting Factors Analysis Project (LFAP) sponsored jointly by Canada's Department of Fisheries and Oceans through the Okanagan Basin Technical Working Group and Douglas County Public Utility Division No. 1 (DCPUD) of Washington State. LFAP required assembly of selected physical data as a basis to predict impacts of climate and water changes on various life history stages of Okanagan sockeye salmon (*Oncorhynchus nerka*).

Historic records of air temperature were retrieved for 4 meteorological stations near Oliver and Osoyoos, British Columbia. Daily mean air temperature is presented for stations: Oliver, Oliver 2, Osoyoos and Osoyoos West.

Hydrographic data is reported for 6 gauging stations on the Okanagan (Canadian portions of river), Okanogan (U.S. portions of river) and Columbia Rivers. All available records of daily mean discharge were retrieved for stations at Okanagan Falls and Oliver, B.C., Oroville, Tonasket, and Malott, WA and from the Columbia River below Wells Dam, WA.

Water temperature records for the Okanagan River and Osoyoos Lake have been recorded sporadically at various times and locations. This report assembles instantaneous water temperature data collected at long term water quality monitoring sites (Oliver, B.C, Oroville, Malott, and Okanogan, WA) as well as daily mean data collected from thermographs installed at Wells Dam, WA and temporary sampling sites along the Okanagan River and in Osoyoos Lake.

Water temperature and dissolved oxygen data have been collected intermittently over the past 30 years for the north, central and south basins of Osoyoos Lake. This report summarizes temperature and oxygen data collected through various studies and water quality sampling programs conducted on Osoyoos Lake.

RÉSUMÉ

Stockwell, M. M., K. D. Hyatt and D. P. Rankin. 2001. A compendium of historic physical variable observations including air temperature, water temperature, river discharge, and dissolved oxygen conditions in selected portions of the Okanagan Basin in Canada and the United States. Can. Data. Rep. Fish. Aquat. Sci. 1078: 8 p. + CD-ROM.

Ce rapport et le cédérom qui l'accompagne présentent des données historiques climat, l'hydrographie et la température de l'eau de la rivière Okanagan ainsi que des données de température de l'eau et d'oxygène dissous dans le lac Osoyoos. Ces données ont été compilées dans le cadre du volet variables physiques du projet d'analyse des facteurs limitants la production du saumon rouge dans le bassin de l'Okanagan (Okanagan Sockeye Limiting Factors Analysis Project - LFAP). Il s'agit d'un projet auquel collaborent le Okanagan Basin Technical Working Group, au nom de Pêches et Océans Canada, et le Douglas County Public Utility Division No. 1 (DCPUD) de l'État de Washington collaborent à ce projet. Dans le cadre du projet, il fallait réunir certaines données physiques pour servir de fondement à la prédiction des effets de changements touchant le climat et les conditions de l'eau sur les divers stades du cycle vital du saumon rouge (*Oncorhynchus nerka*) de l'Okanagan.

On a obtenu les données historiques de la température de l'air mesurée à quatre stations météorologiques situées près d'Oliver et d'Osoyoos, en Colombie-Britannique. Sont ainsi présentées les températures moyennes quotidiennes aux stations suivantes : Oliver, Oliver 2, Osoyoos et Osoyoos Ouest.

Des données hydrographiques sont présentées pour six stations hydrométriques situées sur les rivières Okanagan (partie canadienne de la rivière) et Okanogan (partie américaine de la même rivière) et sur le fleuve Columbia. Toutes les données disponibles de débit moyen quotidien ont été obtenues pour les stations situées à Okanagan Falls et à Oliver, en C.-B., ainsi qu'à Oroville, à Tonasket et à Malott, dans l'État du Washington, et pour le fleuve Columbia en amont de Wells Dam, dans ce même État américain.

La température de l'eau de la rivière Okanagan et du lac Osoyoos a été mesurée sporadiquement à divers endroits. Ce rapport regroupe des données de température de l'eau instantanée recueillies à des sites de surveillance à long terme de la qualité de l'eau (Oliver, en C.-B.; Oroville, Malott et Okanogan, au Washington) ainsi que des températures de l'eau moyennes quotidiennes provenant de thermographes installés à Wells Dam et de stations d'échantillonnage temporaires situées le long de la rivière Okanagan et dans le lac Osoyoos.

Depuis 30 ans, la température de l'eau et la concentration d'oxygène dissous sont mesurées sporadiquement dans les bassins nord, central et sud du lac Osoyoos. Le rapport résume ces données enregistrées dans le cadre de diverses études et programmes d'échantillonnage de la qualité de l'eau réalisés dans le lac Osoyoos.

INTRODUCTION

Okanagan sockeye salmon (*Oncorhynchus nerka*) are one of the southerly most distributed stocks of this species throughout their geographic range. They are the only significant remnant stock of more than a dozen extinct anadromous salmon stocks that historically returned to Canada through U. S. portions of the Columbia River. Over the past 40 years, declines in Okanagan sockeye production have occurred without respite although harvest in marine and freshwater fisheries have been virtually eliminated (Hyatt and Rankin 1999). Declines are thought to be related to the impact of cumulative effects of extensive hydroelectric development in both Canada and the U. S.; agricultural, urban, recreational and forest land use practices; invasions of exotic species of both plants and animals; continuing restriction of salmon to sub-optimal habitats and global climate change in the desert lands of the B. C. interior that threaten Okanagan sockeye stock recovery and persistence.

In Canada these issues have become the focus of activities of the Okanagan Basin Technical Working Group (OBTWG) which is composed of representatives from Canada's Department of Fisheries and Oceans (DFO), the British Columbia Ministry of Environment (MOELP) and the Okanagan Nation Fisheries Commission (ONFC). Early in 1998, the OBTWG was approached by representatives of Washington State's Public Utility District No. 1 of Douglas County (DCPUD) to discuss mutual interests in identifying viable options for increasing the production of Okanagan sockeye salmon at one or more life history stages in order to facilitate stock rebuilding. Extensive consultation between the OBTWG and DCPUD in the intervening period has led to a commitment on the part of both parties to collaborate in a program of work aimed at identifying one or more procedures that might be used to permanently increase the overall production of Okanagan sockeye salmon.

A limiting factors analysis project (LFAP) was initiated in the 2000-2001 fiscal year to assemble and then make "best use" of existing data in analyses to identify the frequency and magnitude of production losses associated with interactions among variations in water flow, water quality (i.e. temperature and oxygen levels), regional climate conditions and specific life history stages (adult migration, adult spawning) of Okanagan sockeye salmon. The current report consists of a compendium of selected climate (air temperature), hydrological (discharge), and water temperature (Okanagan River, Okanagan Lake, Osoyoos Lake) and dissolved oxygen observations (Osoyoos Lake) for the Okanagan Basin. Observations have been assembled from scattered sources on both sides of the Canada-U.S. border. The data assembled here provide a documented foundation as a first step towards analyses to be completed within the context of the Limiting Factors Analysis Project. Further, raw data records have been assembled on a CD-ROM disk to serve as a common source of physical variable data sets accessible to all personnel participating in several projects currently being coordinated by the OBTWG.

METHODS

Air temperature, hydrographic, water temperature and dissolved oxygen data were assembled from existing electronic databases, published documents, unpublished reports and personal records from a variety of sources including government agencies (e.g. B.C. Ministry of Environment, Canada's Department of the Environment, Fisheries and Oceans Canada, U. S. Geological Service, Washington Department of Ecology), municipalities (e.g. City of Kelowna) and private consultants (e.g. Rensel & Associates, Summit Environmental) (Tables 2 and 3).

AIR TEMPERATURE

Environment Canada's Meteorological Services group maintains an archive of climate, hydrographic and water quality data gathered from both active and inactive stations distributed throughout British Columbia and the Yukon. Locations of stations and descriptions of data records at each are available at http://scitech.pyr.ec.ca/climhydro (Environment Canada, Climate, Hydrometric and Water Quality Station Information). This web site was accessed to identify potential sites of air temperature data within the area of interest (Figure 1). Initially, 12 such stations were identified. Climate stations 1125850 (Osoyoos), 1125865 (Osoyoos West), 1125760 (Oliver), and 1125766 (Oliver 2) were ultimately selected for data retrieval on the basis of (i) the quantity and quality of data available and (ii) proximity to key habitat locations used by one or more life history stages of Okanagan sockeye salmon (Figures 1 and 2). Daily mean, maximum and minimum air temperature data, for the complete periods of record were purchased as electronic files from Environment Canada's Climate Data Services (April 4, 2000 and July 24, 2000).

HYDROLOGY

Hydrology stations along the Okanagan River (Canadian spelling) were identified through the above, Environment Canada web site. Stations 08NM002 (Okanagan Falls), 08NM085 (Oliver), and 08NM127 (Oroville, WA) were selected from 10 potential sites based on the number of years of coverage and seasonal continuity of records. Daily mean discharge data (m^3/sec), for the complete period of record were received as electronic files from Data Management, Water Survey of Canada (March 29, 2000 and June 23, 2000; Figure 2). The United States Geological Service (USGS) provides identification of stream gauging stations, station information and access to historical discharge data for U.S. portions of the Okanagan Basin through their web site http://waterdata.usgs.gov/nwis-w/WA/ (Water Resources of Washington State). Complete records of daily mean discharge (ft^3/sec) from Okanogan River (American spelling) stations 12445000 (near Tonasket), 12447200 (at Malott) and Columbia River station 12450700 (below Wells Dam) were downloaded from the USGS web site (July 28, 2000; Figure 2).

WATER TEMPERATURE

There are no long term, continuous water temperature monitoring sites within the Okanagan Basin study region. Consequently, a variety of sources (identified in more detail below; Tables 2 and 3) and data types (i.e. instantaneous or daily mean measures from both hand held thermometers and thermographs) were identified and assembled to produce expanded summary tables of historic water temperatures. When multiple sources provided data for the same location and time period, the source covering the longest interval of time was chosen for inclusion in the tables.

Okanagan, Okanogan and Columbia Rivers

Long term, ambient water quality monitoring stations were identified on the Okanagan (http://scitech.pyr.ec.ca/climhydro Environment Canada, Climate, Hydrometric and Water Quality Station Information) and Okanogan Rivers (http://www.ecy.wa.gov/programs/eap/fw_riv/okanogan.html Washington State Department of Ecology, Okanogan Water Quality Management Area). These permanent stations are regularly sampled for a wide range of water quality variables including water temperature. Electronic temperature data files were requested and received for Station 08NM085 Oliver (Data Management, Water Survey of Canada) and for Stations 49A190 Oroville, 49A070 Malott, and 49A090 Okanogan (W. Ehinger, Wash. Dept. of Ecology, pers. com.). Data were received as instantaneous measures and include time of day samples were collected. Electronic temperature records were further supplemented with data from published documents (Allen and Meekin 1980, Anon. 1954, Anon. 1977, Craddock 1958, Major and Mighell 1966).

Long term, continuous daily mean temperature data (1985-1998) from the Columbia River at Wells Dam were received as electronic files (R. Klinge, DCPUD, pers. com.). Temperatures, originally received as degrees Fahrenheit, were converted to degrees Celsius. Descriptions of data origins and data quality issues may be found at ftp://ftp.streamnet.org/pub/streamnet/crbtdata/wel-pud_scroll.doc.

Short term, continuous, daily temperature records have been established through project specific, thermograph installations at select locations on the Okanagan River. Electronic records of thermograph readings were obtained for McIntyre and Zosel Dam sites, Okanogan River near Malott, WA (R. Klinge, DCPUD, pers. com.), and Okanagan River near VDS 13 (D. Smith, DFO, Penticton, pers. com.). Data for McIntyre, Zosel and Malott locations were received as daily mean, maximum and minimums while those from VDS13 were received as hourly temperatures. Temperature records at McIntyre[1] and Zosel Dam sites were further supplemented with data from published documents (Allen & Meekin 1980, Craddock 1958).

---

[1] McIntyre Dam may also be referred to as Vaseux, Vaseaux, S.O.L.P., or S.O.L.I.D. Dam in published literature.

Osoyoos Lake

Surface water temperature data and temperature-depth profiles were assembled for the north, central, and south basins of Osoyoos Lake. British Columbia Ministry of Environment, Lands and Parks (MoELP) maintains records of environmental water quality information in the Environmental Monitoring System (EMS) database. EMS was accessed by MoELP personnel (V. Jensen, MoELP, Penticton, pers. com.) to obtain water temperature records for Osoyoos Lake north basin (EMS ID 500728) and south basin (EMS ID 500248). Additional surface temperature and depth profile data were gathered from published (Allen and Meekin 1980, Anon.1997 & 1998, Blanton and Ng 1972, Rensel 1995 & 1996) and unpublished (V. Jensen, pers. com. and P. Rankin, DFO, Nanaimo, pers. com.) reports.

DISSOLVED OXYGEN

Dissolved oxygen-depth profiles were assembled for the north, central and south basins of Osoyoos Lake. The EMS database was accessed (V. Jensen, MoELP, Penticton) to retrieve DO records for the north (EMS ID 500728) and south basins (EMS ID 500248). Central basin and additional north and south basin data were obtained from published (Allen and Meekin 1980, Anon. 1997 & 1998, Rensel 1995 & 1996, Pinsent and Stockner 1974) and unpublished (V. Jensen, pers. com. and P. Rankin, DFO, Nanaimo, pers. com.) reports.

Individual researchers often provided temperature and dissolved oxygen data from several different sampling sites, unique to each study, within each basin of Osoyoos Lake. For the purposes of this report, we chose to assemble data from those sites in common or in close proximity across all studies and sampling programs (Figure 3).

RESULTS

Daily mean air temperature data for 4 climate stations are included as Microsoft® EXCEL 97 worksheets on the accompanying CD-ROM (Table 1). The extent and continuity of period of record for each of these stations is illustrated in Figures 4 and 5. Combined records from climate stations 1125760 (Oliver) and 1125766 (Oliver 2) provide a continuous air temperature record from February 3, 1924 to April 30, 1999. Plots illustrating annual variations in daily mean temperature for these 2 stations are presented in Figures 9 and 10.

Daily mean discharge data for 6 hydrographic stations are included as Microsoft® EXCEL 97 worksheets on the accompanying CD-ROM (Table 1). The extent and continuity of period of record for each of these stations is illustrated in Figures 6 to 8. Okanagan River water gauging stations 08NM085 (near Oliver) and 08NM002 (at Okanagan Falls) provide data from 1944 through 1998 and 1915 through

1998, respectively. Plots illustrating annual variations in daily mean discharge at these 2 stations are presented in Figures 11 and 12.

Water temperature data are presented in Tables 4 through 8 and 12 through 15. Water temperatures collected at McIntyre Dam (Table 4) and Vertical Drop Structure 13, B.C. (Table 5), Zosel Dam (Table 13) and Wells Dam, WA (see Table 1) are reported as daily means. Data from Osoyoos Lake, B. C. (Tables 7 to 9), and Okanogan River at Okanogan (Table 12), are presented as instantaneous measurements. Table 6, Okanagan River near Oliver, Table 12, Okanogan River near Oroville and Table 15, Okanogan River at Malott combine both daily mean and instantaneous water temperatures (dates identified in Tables). Monthly temperature-depth profiles for individual basins of Osoyoos Lake are illustrated for the years 1997, 1996, 1995, 1994 and 1972 (Figures 13 to 17). Multiple sources of water temperature data were used in order to expand the period of record and area of coverage as much as possible. Please note that a preliminary review of the data suggests a difference of 3 - 4°C may commonly exist between daily maximum and minimum temperature measurements although differences as large as 10 °C may rarely occur. Water temperature data are also included as Microsoft® EXCEL 97 worksheets on the accompanying CD-ROM (Table 1).

Dissolved oxygen data are summarized for the north, central and south basins of Osoyoos Lake (Tables 10 and 11). Examples of dissolved oxygen-depth profiles by month for Osoyoos Lake are illustrated for the years 1997, 1996, 1995, 1994 and 1972 (Figures 18 to 22). Oxygen data are also included as Microsoft® EXCEL 97 worksheets on the accompanying CD-ROM (Table 1).

		South	Dissolved oxygen concentration, by depth, for South Basin of Osoyoos Lake
		Sources	Data Sources
Water Temperature/			
	McIntyre_Dam.xls	Temperature	Daily mean water temperature at McIntyre Dam, BC.
		Comments	Station information and data source(s)

Table 1, continued.

FOLDER	FILE	SHEET	DESCRIPTION
Water Temperature/			
	OK@Malott.xls	Temperature	(mixed) instantaneous and daily mean water temperatures near Malott, WA.
		Comments	Station information and data source(s)
	OK@Okanogan.xls	Temperature	Instantaneous water temperature at Station 49A090
		Comments	Station information and data source(s)
	OK@Oliver	Temperature	(mixed) instantaneous and daily mean water temperatures near Oliver, BC.
		Comments	Station information and data source(s)
	OK@Oroville	Temperature	Instantaneous water temperature at Station 49A190
		Comments	Station information and data source(s)
	OK@VDS13	Temperature	Daily mean water temperature near VDS 13 on the Okanagan River
		Comments	Station information and data source(s)
	Osoyoos_Lake.xls	Map	Map of Osoyoos Lake identifying water quality sampling stations
		Surface	Osoyoos Lake surface water temperature - all basins
		Depth_N	Water temperature by depth - North Basin, Osoyoos Lake
		Depth_C	Water temperature by depth - Central Basin, Osoyoos Lake
		Depth_S	Water temperature by depth - South Basin, Osoyoos Lake
		Comments	Station information and data source(s)
	Wells_Dam.xls	Temperature	Daily mean water temperature of the Columbia River near Wells Dam, WA.
		Comments	Station information and data source(s)
	Zosel.xls	Temperature	Daily mean water temperature at Zosel Dam, WA.
		Comments	Station information and data source(s)

Table 2: Identity, location, period of operation and agency sponsor for long term climate, hydrographic and water quality stations of interest in the Okanagan Basin study area.

1. Temperature data for April through October are from anon. 1998; November data from P. Rankin, DFO, Nanaimo, unpublished data.

2. Table 9 provides further dates for which temperature profiles of Osoyoos Lake are available. All data are included on the accompanying CD-ROM.

Table 9: A list of dissolved oxygen concentration versus depth profiles assembled for Osoyoos Lake from various studies and authors and included as records on the study area CD-ROM.

1. Dissolved oxygen data for April through October from Anon. 1998; November data from P. Rankin, DFO, Nanaimo, unpublished data.

2. Table 11 provides further dates for which dissolved oxygen profiles of Osoyoos Lake are available. All data are included on the accompanying CD-ROM.

Table 11: A list of dissolved oxygen concentration versus depth profiles assembled for Osoyoos Lake from various studies and authors and included as records on the study area CD-ROM.

Station Name: Oliver
Station ID: 1125760
Station Location: British Columbia
Latitude: 49.1667
Longitude: -119.5667
Period of Record: 1-Jun-38 to 30-Apr-99
Station Status: active
Data Description: daily mean air temperature (degrees Celcius)
Data Source: Climate Data Services, Meterorological Services, Environment Canada (604 - 664 - 9067). Received July 24, 2000.

Station Name: Oliver 2
Station ID: 1125766
Station Location: British Columbia
Latitude: 49.1833
Longitude: -119.55
Period of Record: 3-Feb-24 to 30-Apr-00
Station Status: active
Data Description: daily mean air temperature (degrees Celcius)
Data Source: Climate Data Services, Meterorological Services, Environment Canada (604 - 664 - 9067). Received July 24, 2000.

Station Name: Osoyoos
Station ID: 1125850
Station Location: British Columbia
Latitude: 49.0167
Longitude: -119.4667
Period of Record: 1-Apr-54 to 31-Dec-90
Station Status: inactive
Data Description: daily mean air temperature (degrees Celcius)
Data Source: Climate Data Services, Meterorological Services, Environment
Canada (604 - 664 - 9067). Received April 4, 2000.

Station Name: Osoyoos West
Station ID: 1125865
Station Location: British Columbia
Latitude: 49.0333
Longitude: -119.4667
Period of Record: 1-Apr-67 to 30-Apr-99
Station Status: active
Data Description: daily mean air temperature (degrees Celcius)
Data Source: Climate Data Services, Meterorological Services, Environment
Canada (604 - 664 - 9067). Received April 4, 2000.

Station Name: **Columbia River below Wells Dam, WA**
Station ID: 12450700
Station Location: Washington
Latitude: 47 56 48
Longitude: 119 51 56
Period of Record: 1-Oct-67 to 30-Sep-99
Data Description: daily mean discharge measured in cubic feet per second
Data Source: Water Resources of Washington State, USGS. Washington
NWIS-W Data Retrieval Page <http://waterdata.usgs.gov/nwis-w/WA/>
Accessed July 28, 2000.

Station Name: Okanogan River at Malott, WA
Station ID: 12447200
Station Location: Washington
Latitude: 48 16 53
Longitude: 119 42 12
Period of Record: 18-Dec-65 to 30-Sep-99
Data Description: daily mean discharge measured in cubic feet per second
Flags: a value of 'e' represents an estimate was made for that day
Data Source: Water Resources of Washington State, USGS. Washington NWIS-W Data Retrieval Page <http://waterdata.usgs.gov/nwis-w/WA/> Accessed October 24, 2000.

Station Name: Okanagan River at Okanagan Falls
Station ID: 08NM002
Station Location: British Columbia
Latitude: 49.3422
Longitude: -119.5778
Period of Record: 01-Jan-15 to 31-Dec-98
Station Status: active
Data Description: daily mean discharge measured in cubic metres per second
Data Source: Data Management, Water Survey of Canada, Meteorological Services, Environment Canada (604-664-9324). Received March 29, 2000.

Station Name: Okanagan River at Okanagan Falls
Station ID: 08NM002
Station Location: British Columbia
Latitude: 49.3422
Longitude: -119.5778
Period of Record: 01-Jan-15 to 31-Dec-98
Station Status: active
Data Description: daily mean discharge measured in cubic metres per second
Data Source: Data Management, Water Survey of Canada, Meteorological Services, Environment Canada (604-664-9324). Received March 29, 2000.

Station Name: Okanagan River near Oliver
Station ID: 08NM085
Station Location: British Columbia
Latitude: 49.1147
Longitude: -119.5639
Period of Record: 07-Aug-44 to 31-Dec-99
Station Status: active
Data Description: daily mean discharge measured in cubic metres per second
Data Source: Data Management, Water Survey of Canada, Meteorological Services, Environment Canada (604-664-9324). Received March 29, 2000.

Station Name: Okanogan River at Oroville, WA
Station ID: 08NM127
Station Location: Washington
Latitude: 49.9308
Longitude: -119.4192
Period of Record: 01-Jan-42 to 31-Dec-98
Station status: active
Data Description: daily mean discharge measured in cubic metres per second
Data Source: Data Management, Water Survey of Canada, Meteorological Services, Environment Canada (604-664-9324). Received March 29, 2000.

Station Name: Okanogan River near Tonasket, WA
Station ID: 12445000
Station Location: Washington
Latitude: 48 37 57
Longitude: 119 27 38
Period of Record: 1-May-29 to 30-Sep-99
Data Description: daily mean discharge measured in cubic feet per second
Flags: a value of 'e' represents an estimate was made for that day
Data Source: Water Resources of Washington State, USGS. Washington
NWIS-W Data Retrieval Page <http://waterdata.usgs.gov/nwis-w/WA/>
Accessed October 24, 2000.

Station Name: Columbia River at Wells Dam
Station ID:
Station Location: at Columbia River mile 515.6, in the center of the dam
Latitude:
Longitude:
Period of Record: 01/01/85 to 03/19/98 (no data 07/13/90 to 10/28/91)
Data Description: daily mean water temperature (degrees Celcius)

Data Source: R. Klinge, District Fisheries Biologist, Public Utility District No. 1
of Douglas County, East Wenatchee, WA (509-884-7179)
September 1998 [personal e-mail]
